

Orion Atlas Pro AZ/EQ-G Computerized GoTo Telescope Mount

Addendum to Instruction Manual IN 479

Français

① Pour obtenir le manuel d'utilisation complet, veuillez vous rendre sur le site Web **OrionTelescopes.eu/fr** et saisir la référence du produit dans la barre de recherche.

② Cliquez ensuite sur le lien du manuel d'utilisation du produit sur la page de description du produit.

Deutsche

① Wenn Sie das vollständige Handbuch einsehen möchten, wechseln Sie zu **OrionTelescopes.de**, und geben Sie in der Suchleiste die Artikelnummer der Orion-Kamera ein.

② Klicken Sie anschließend auf der Seite mit den Produktdetails auf den Link des entsprechenden Produkthandbuchs.

Español

① Para ver el manual completo, visite **OrionTelescopes.eu** y escriba el número de artículo del producto en la barra de búsqueda.

② A continuación, haga clic en el enlace al manual del producto de la página de detalle del producto.

The Orion Atlas Pro AZ/EQ-G Computerized GoTo Telescope Mount has been upgraded with a built-in USB port. This addition was made after the instruction manual for this mount was produced, so it is not pictured or described in the manual. This Addendum is included to make you aware of this new feature.

The USB port is installed on the mount's electronics panel (**Figure 1**) and is a USB Type B port. Note also that the relative positions of some other ports on the faceplate have changed, e.g., the Hand Control port is now located below the Auto Guide port.

The USB port enables control of the mount with select 3rd party software applications running on a computer, and allows updating of the mount's motor controller firmware via USB connection to a computer. Most computers are equipped with one or more USB Type A ports. So the cable you would need to purchase to make the connection between your computer and the Atlas Pro mount is a USB-A to USB-B cable.

Figure 1. A USB Type B port has been added right below the Hand Control port on the electronics panel.
